

Summer Creative Challenge

Over the summer, it's easy for students to lose the creative momentum that they've built over the last school year. To help combat summer creative learning loss, students can use Soundtrap to stay fresh and create songs and podcasts while away from school.

Over the summer, create at least 1 original song or podcast using Soundtrap

The Prize

One winning podcast and one winning song will be selected for each of the following grade bands: K-5, 6-8, and 9-12. The winning songs and podcasts will be announced and shared via the Soundtrap for Education Blog and social. The winners will also receive an award delivered to their school in fall.

The Challenge

Option 1 - Build an Original Song

Use Soundtrap instruments, loops, and recording studio to create your own original song of any genre.

Option 2 - Build a Podcast

Use Soundtrap instruments, loops, and recording studio to create your own original podcast on a topic of your choosing.

The Rules

Your song or podcast must:

- be over 1 minute long
- be an original creation
- be made using Soundtrap for Education
- be completed and submitted by August 15, 2019

Submit Your Song or Podcast Here By August 15, 2019:
